

Date: 4/18/16

Effective Date: May 2, 2016

Title: ANCA Testing Performed at Mayo

Tests: Neutrophil Cytoplasmic AB (ANCA)

Explanation of change:

Testing for anti-neutrophil cytoplasmic antibodies (cANCA and pANCA) is useful for evaluating patients suspected of having autoimmune vasculitis.

Due to low test volume, testing will be moved from in-house to Mayo Medical Laboratories.

| | Old | New |
|-----------------|----------------------------------|----------------------------------|
| Test Name | Neutrophil Cytoplasmic AB (ANCA) | Neutrophil Cytoplasmic AB (ANCA) |
| Test Code | NCA | ANCAMML |
| Perform Site | CMC | MAYO |
| Method | Immunofluorescence | Immunofluorescence |
| Reference Range | Negative | Negative |
| Specimen | SST | SST |
| Volume Required | 0.5 mL | 0.5 mL |
| Turnaround time | 2-5 days | 2-4 days |
