## Laboratory Technical Bulletin

**Date:** 11/7/2025

**Effective Date:** 12/1/2025

**Title:** CK-MB Testing Discontinued

**Test:** CK-MB

**Explanation:** As current guidelines discourage use of CK-MB and it is obsolete in most modern laboratories, CK-MB testing will be discontinued at Cayuga Medical Center. CK-MB for the assessment of acute myocardial infarction (AMI) has largely been replaced by troponins. When cardiac troponin is available, the CK-MB should not be used for the diagnosis.

	Current	New
<i>Perform Site</i>	CMC Main Lab	Not orderable
<i>Test Code</i>	LAB2338 CKMB	
<i>Specimen</i>	PST or SST	
<i>Turnaround time</i>	Same Day
