Title: Sodium Reference Range Change

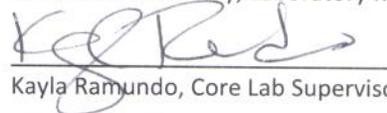

Test: Sodium

Explanation of change: After completing additional normal range studies on new chemistry instrumentation, it was determined the reference range of sodium (Na) needed to be adjusted. The reference range will change from 139-145mmol/L to 135-145mmol/L.

	Old	New
<i>Reference Range</i>	139-145 mmol/L	135-145 mmol/L
