Date: 10/24/2018

Effective Date: 10/24/2018

Title: Update to Hepatitis C Virus Reports

Test: HCV

Explanation of change:

Hepatitis C reports will now include an index value in addition to qualitative interpretation. The following table summarizes the relationship between index and interpretation.

| OLD | NEW |
|-----------------------|-----------------------------|
| Interpretation | Index/Interpretation |
| Non-Reactive | 0.0 – 0.80/Non-Reactive |
| Low Reactive | 0.90-10.90/Low Reactive |
| High Reactive | > 10.9/High Reactive |
